

Webinar Invitation

New ecodesign and energy labelling regulations for tumble dryers: What changes will take place in 2025? A webinar for tumble dryer suppliers

In 2025, new ecodesign and energy labelling regulations for tumble dryers will apply. New minimum criteria will be introduced, new information requirements will apply and you will have to insert new product information into EPREL and distribute new energy labels to dealers. What exactly are the changes? When and what action will you have to take?

We invite you to the upcoming webinar to learn more and to ask for more details!

Introduction and guest speakers:

- Ms. **Giulia Zilla**, Policy Director, Energy & Environment, APPLiA
- Mr. **Bernardo Martinez**, Policy Officer – Buildings and Products, European Commission

Agenda:

- New minimum requirements on product performance:** Which new minimum requirements will apply (e.g. energy efficiency, condensation efficiency, circumvention, software updates), what does this mean for your products?
- New types of requirements:** What do you have to consider regarding resource efficiency? What do you have to show on your website?
- EPREL database:** How to work with the product database concerning update of model data?
- Energy label and the product information sheets:** What are the changes in the energy labels and product information sheets for tumble dryers?
- Information for dealers:** What do you have to deliver to dealers and when?
- 2025 calendar:** Overview about the timeline of the above requirements: From when do the different requirements apply?
- Market surveillance:** What are the key aspects that have to be considered when a market surveillance authority is doing checks on your products?
- Compliance Services project:** How we can help you
- Your Questions:** Use your opportunity to submit questions ahead of the webinar!
